Objective,

My goal is to become a professional neurosurgeon who not only treats the brain but also understands the human experience through science and empathy. Alongside my medical journey, I aim to use creative writing, storytelling, and leadership to advocate for Afghan women. By merging science, technology, and art, I want to inspire and heal both physically and emotionally.

Education

Sheikh Muhammad Siddiq Shahab High School

(Current Student – Grade 11)

Leadership & Empowerment Programs:

- Women Empowerment Workshop
- Global Ipodia Leadership Program
- Various Online Courses (Coursera, Cisco, UniAthena)

Skills

- Web Development: HTML, CSS, PHP, SQL.
- Creative Software: Adobe Premiere Pro.
- Cybersecurity & Networking: Network+ training, member of Afghan Dreamers.
- Writing & Research: Analytical, motivational, scientific, and fictional writing in English and Dari.
- Social Leadership & Advocacy: Active in programs supporting women's rights and education.
- Languages: Fluent in Dari and English; currently learning a third language.
- Photography & Calligraphy: English calligraphy and creative photography.
- Critical Thinking: Deep analysis of philosophical and social issues.

Experience

Web Design Projects

- Developed educational websites such as “Afghan Aria Private School”.
- Designed creative web pages showcasing student achievements and artistic work.

Freelance Writer & Researcher

- Published articles in English and Dari on social, motivational, and philosophical themes
- Focused on issues surrounding Afghan women and their stories.

Participant – Leadership & Education Programs

- Engaged in global dialogues, projects, and workshops about education and women's empowerment.
